

# Data Architecture Screening Workshop.

Optimized data assets are critical to a company's success. Only a consistent data architecture ensures the ability to innovate and maintain competitive advantages. Our Data Architecture Screening Workshop enables a thorough analysis of your current data landscape, aligns requirements and identifies potential use cases tailored to your business objectives.

## Workshop Overview

Our Data Architecture Workshop is a collaborative and interactive session led by our team of experienced data architects. During the workshop, we work closely with your stakeholders.

### IDENTIFYING POTENTIAL APPLICATIONS

Identify and prioritize data-driven use cases that align with your business objectives.

### REQUIREMENT SPECIFICATION

Capture and analyze requirements to define a modern data structure, including data governance, compliance (GDPR), and business objectives.

### ASSESSMENT OF CURRENT DATA LANDSCAPE

Assessment of existing data infrastructure, processes and technologies to gain insights into the current state of the data environment.

### IDENTIFICATION OF DATA SOURCES

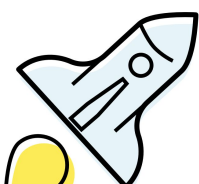

Identification and evaluation of the necessary data sources to be incorporated into the data structure, taking into account factors such as data quality and accessibility.

### ESTIMATION AND DESIGN

Cost estimation and implementation effort for the proposed solution approach.

## Key benefits

- **Understanding the data environment:** Gain clarity on the current data structure and identify areas for improvement.
- **Aligned objectives:** Ensure that the proposed data structure serves the core objectives of the organisation.
- **Risk mitigation and compliance:** Address GDPR and data handling concerns to ensure regulatory compliance.
- **Informed decision-making:** Gain visibility into resource allocation and project prioritisation.

## What does a data architecture screening workshop look like?

### Goal

Identification of the data architecture for your company.

### Format

1 day on site or online + 2 x 4 hours

### Participants

3-10 project managers, subject matter experts and end users

## About Public Cloud Group.

The Public Cloud Group (PCG) supports companies in their digital transformation through the use of public cloud solutions.

With a portfolio designed to accompany companies of all sizes on their cloud journey, as well as the expertise of numerous certified experts with whom customers and partners enjoy working, PCG positions itself as a reliable and trustworthy partner to hyperscalers.

As an experienced partner of the three relevant hyperscalers (Amazon Web Services (AWS), Google Cloud and Microsoft Cloud), PCG holds the highest awards from each provider and advises you, our customers, independently on your cloud journey.
