RISE Assessment.

We know from experience: Not every process is "RISE-ready", not every scenario fits into the SAP template. Our assessment offers expert workshops with honest feedback, technical depth and alternative approaches. The aim is to develop a solid basis for decision-making with an independent partner who is also familiar with the key issues relating to connectivity, traffic and cloud integration with hyperscalers.

Rise Assessment with PCG.

The PCG RISE Assessment provides you with a comprehensive overview of your SAP migration opportunities—completely cost-free. Simply provide your consent, and within 60 days, you will receive a detailed, actionable report. The assessment is designed to be neutral and independent, compatible with all leading hyperscalers. Gain valuable insights for your cloud transformation effortlessly and without any financial obligation.

CHOOSE YOUR ASSESSMENT FOCUS

Technical Readiness Assessment & BOM Review
We conduct a readiness check and system analysis, analyze interfaces and compatibilities, and provide a high-level guide to migration preparation, including which actions to take before switching to RISE. We also optimize your system to question the system sizing in the RISE BOM.

Future Operational Model
We conduct an R&R (Roles & Responsibilities) Matrix Evaluation: SAP RISE vs. classic basis and identification of gaps in the configuration of the SAP RISE R&R Matrix. We consider the costs for additional services that are „Extra" at SAP, and conduct a risk assessment/Service Level changescompared to the status quo.

Future Sourcing Model for the System Landscape
We evaluate the RISE Footprint and consider hybrid scenarios, depending on the system landscape and the life cycle of the SAP system lines.

Target Design
We develop a target scenario for RISE Footprint, system landscape, and operating model and give you clear recommendations for action, including system readiness for migration preparation.

Hyperscaler Comparison
We support your choice of hyperscaler using objective decision criteria (functional and technical aspects, not commercial aspects)

Deliverable Presentation
We document the assessment results in a report and present this including the target scenario and recommendations for action.

Public Cloud Group

End-to-End support for your RISE (or hybrid cloud) journey.

ASSESS
RISE Assessment Workshops:
- Technology + Tasks
- Cost + Risk
- Target design

MOBILIZE
- RISE Connectivity
- Selling RISE (incl. innovation funding as budget usable)

MIGRATE
- RISE Migrations
- hybrid Migrations
- Migration from on-prem PI/PO to BTP Integration suite

OPERATE
- RISE+ Managed Service on top of RISE
- Managed Service for SAP and Non-SAP on Hyperscaler-native

INNOVATE
- PCG AIhub
- SAP BDC
- AMM Azure Modernize

PCG is your partner for your "SAP on Cloud" mission to be successful.

AUTOMATION DRIVEN

Software
- Automated SAP BASIS operation
- Migration acceleration
- BTP Enablement & Clean Core

Consulting
› 20 years experience in SAP Technology Consulting

Managed Service
- Managed SAP on cloud
- Managed cloud operation
- RISE+
